SUMMARY EXPERIENCE

Most use JavaScript to develop web applications, and are also familiar with front end development such as ReactJS and VueJS. Recently I learned about building back end development with Go and Fiber.

After I took bootcamp in Fullstack Development I started to like this field and I realized that this opportunity is what I should take. As I plunged into the front-end more and more, my curiosity grew. I subscribe to github, freecodecamp, scrimba, udemy, etc. I learned to work with several libraries and frameworks and implemented them into my mini projects.

Every day I learn something new and experience many mistakes and always improve myself. I'm learning React & Go at the moment. I am looking for a place where I will be able to increase my knowledge and experience. It's great to have the opportunity to use the technology for more difficult projects. It is possible to take other work opportunities outside of that.I am a persistent person and have the courage to improve.

PROFESIONAL EXPERIENCE

Company Name	**:**	**PT Mitra Talenta Grup (Celerates)**
Company Industry	:	IT Consultant
Period	:	Juli 2022 – Now
Position Title	:	System & Application Development
Job Description	:	Learn web basic programming, data structure & database using PostgreSQL, front-end development, back-end development, CI/CD and also project management accompanied by working on several application projects such as REST API, Point of Sales.

Company Name	**:**	**PT Sarana Trimitra Solusindo Pratama**
Company Industry	:	Electrical Automation
Period	:	January – August 2020
Position Title	:	Program Technician
Job Description	:	Worked on several automation system projects such as: -Create and analyze various process systems in industry including LS PLC, servo control, control electro motor with inverter. -Create LS PLC and LS HMI programs according to the system.

Company Name	**:**	**Morning Glory Enterprise**
Company Industry	:	Information Technology
Period	:	January – September 2019
Position Title	:	Web Developer
Job Description	:	Worked on several internal and client web projects including: ensuring user requirements on the site can be met, making application development plans, front-end validation, fetching data from API, implementing clean code in building web applications, testing applications, project documentation.

Berlaku hingga 06 September 2025

dicoding

Kelas ini ditujukan untuk seorang Front-End Web Developer yang ingin mengembangkan website yang komponen UI-nya *reusable*, *deklaratif*, dan bersifat reaktif terhadap perubahan data. Di akhir kelas ini, siswa dapat membuat aplikasi web dengan React yang memanfaatkan functional component, stateful component, dan controlled component.

Materi yang dipelajari:

- **Pengenalan React :** Berkenalan dengan React, mengetahui alasan mempelajari React, dan mengenal ekosistem yang ada di React (1 Jam 35 Menit)
- **Konsep Dasar React :** Belajar tentang konsep dasar React seperti composition, declarative code, unidirectional data flow, dan menyadari bahwa React hanyalah JavaScript (2 Jam 45 Menit).
- **React UI Component :** Belajar tentang membangun UI di React seperti mengenal element dan component. Serta, belajar juga konsep component properti yang membuat UI aplikasi bersifat reusable (7 Jam).
- **Stateful Component :** Belajar tentang class component, menggunakan state di dalam component, memahami dan mempraktikkan controlled component (6 Jam 50 Menit).

Evaluasi pembelajaran :

- Submission (Proyek Akhir) berupa membangun web aplikasi dengan React yang menerapkan *reusable component, stateful component, controlled component.*
